CUSTOM ORDER FORM FOR WINTER COVERS, SHUTTERS AND LIGHT TRAP

All custom winter cover orders MUST include this form signed by the purchaser.

Allow up to 4-5 weeks for delivery

PRICING

Once the inside "frame dimensions are determined (which is the part of the winter covers which fits inside the fan) round up to the next "standard" size listed in our catalogue to arrive at the list price starting point. For example, if the desired inside dimension is 40"x40", the next standard size is for out AF36E Agrifan which measures 41-7/8" sq. You will add **\$100.00** to the list price of the 36E Agrifan and this will be the revised list price for your custom order (i.e. \$185.00 plus \$100.00 = \$285.00)

** If the size is larger than 64"x64" please call for a quote.

VERY IMPORTANT:

The measurement given to us **must be the actual tight opening your customer needs the panel to fit into.** It is imperative that the measurements are taken in several locations to determine the smallest point of the minimum opening. Measure corner to corner to ensure it is square. Exacon will then deduct from your tight opening size what we feel is necessary to allow for the weather stripping used on the particular size(s) ordered.

NOTE: The current location of shutter clips cannot be considered in the special size panels. Shutter clips may need to be moved and re-installed with screws.

Placing the order:

THIS FORM MUST BE INCLUDED WITH YOUR PURCHASE ORDER

Use part number "CUSTOM" on your PO for all special size winter covers.

QTY	Min. Opening Width	Min Opening Height
		X

		X
		X

NOTES:

I understand that these measurements are the tight opening of the hole we want the special winter cover to fit and realize that Exacon will deduct from these measurements to allow for weather stripping. It is also understood that once manufacturing begins winter panels cannot be cancelled or returned.

Print Name: _____

Signature: _____

Note: In all cases winter covers will be made with white panel facing inside the barn and black panel facing outside the barn or towards fan blade side.
