

# THE POPHOLE

An innovative solution designed to improve animal welfare and environmental control in poultry farming. The Pophole is created to meet the growing need for more animal-friendly practices.

This future-proof design complies with strict industry standards, contributing to sustainable farming. Its easy-to-install structure makes it a versatile choice for modern farming systems.

Insulated panel;  
durable and peck-proof

Sealed against the wall;  
constant contact guaranteed

Weatherproof construction;  
suitable for both indoor and outdoor

Easy to install and  
maintenance

**INSULATED, DURABLE PANEL**

Glass fiber reinforced Polyester on the outside. Designed to be cost-efficient, enabling a lighter operating system

**FULLY SEALED**

Ensures optimal insulation, preventing false airflow and enhancing ventilation control within the barn.

**EASY INSTALLATION AND MAINTENANCE**

The modular design allows for straightforward installation and easy replacement parts

**WEATHERPROOF CONSTRUCTION**

Suitable for both indoor and outdoor installations, guaranteeing longevity and reliability
