

Introducing

# THE POPHOLE

YOUR PORTAL TO POULTRY ACCESS

Insulated panel;  
durable and peck-proof

Sealed against the wall;  
constant contact guaranteed

Weatherproof construction;  
suitable for both indoor and outdoor

Easy to install and  
maintenance

# THE POPHOLE

## YOUR PORTAL TO POULTRY ACCESS

TPI-Polytechniek is proud to introduce the Pophole, an innovative solution designed to improve animal welfare and environmental control in poultry farming. The Pophole is created to meet the growing need for more animal-friendly farming practices.

### **Insulated, durable panel**

Glass fiber reinforced Polyester on the outside. Designed to be cost-efficient, enabling a lighter operating system.

### **Fully sealed**

Ensures optimal insulation, preventing false airflow and enhancing ventilation control within the barn.

### **Spring-pressured rail slider**

Ensures smooth movement and eliminates the risk of jamming due to dirt accumulation.

### **Easy installation and maintenance**

The modular design allows for straightforward installation and easy replacement of parts.

### **Weatherproof construction**

Suitable for both indoor and outdoor installations, guaranteeing longevity and reliability.

### **Rounded corners**

Easy cleaning and enhance overall maintenance.

This future-proof design complies with strict industry standards, contributing to sustainable farming. Its easy-to-install structure makes it a versatile choice for modern farming systems.
